

Corporate Partners

- Do your employees have English-speaking families?
- Do you provide a service to support your families?
- Is this sufficient for the needs of your families and does it link with local services?

The HUB can offer support for your families from the very start of a move to the Geneva area and or through their parenting journey. Ways to do this include:

- Promoting www.thehub-geneva.org as a source of local English-speaking parenting help and support
- Signposting to **HUB@Home**: Our 1:1 volunteer service which matches families with young children to a trained volunteer who can offer support over a sustained period. *This is particularly helpful for new parents who are struggling to cope with the demands of parenthood, a new baby and or trying to access local services.*

We offer local information, allow parents to share their experiences and feelings and give them the freedom to acknowledge any difficulties they may experience. We know personal support can make a real difference when parents are feeling isolated and are struggling.

Help us to help you! Consider if you can:

- Make The HUB your Charity of the Year
- Sponsor HUB@Home volunteer training programme or The HUB website
- Encourage staff to fundraise for The HUB
- Promote The HUB volunteering opportunities to your staff, or even offer them time away from work to volunteer for us.

Advocacy for International Family Voice: A significant proportion of the population in the canton of Geneva are international. Through our work we are always learning about the specific difficulties families are facing. As a result, we advocate to make improvements for international families to stay healthy and well and feel part of their local community. Please share your experiences and feedback on your community needs to help us to achieve this.

The HUB is here to work with you! Contact info@thehub-geneva.org for information.
